Hello Mitch. The attached is the most recent information I have. You should contact Lauren Fondahl, USEPA Biosolids coordinator (415-972-3514). She may have a more current report. I am copying Lauren on this note. Take care,
Johnny g.

Subject: Biosolids programs in CA

Good morning,

I'm currently working on a project for the SFPUC that requires data on all wastewater treatment plants with biosolids programs in the state of California. I'm wondering whether you have a list of such agencies/programs? If not, do you have any suggestions for where I could look or who else to contact?

Thanks in advance,

Mitch Aman
